EDUCATION

University of Florida, Herbert Wertheim College of Engineering

B.S. Computer Engineering

Gainesville, FL

Expected Dec 2026

- **Awards:** Hispanic Scholarship Fund (HSF) Scholar | SHPE Scholar | MLT Career Prep Fellow
- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Microprocessor Applications, Computer Organization, Digital Design

TECHNICAL SKILLS

Languages: Go, Python, C++, C, SQL, TypeScript, JavaScript, HCL (Terraform), VHDL (Fluent: English, Spanish)
Systems & Infrastructure: Kubernetes, Docker, Terraform, Bazel, AWS (S3), gRPC, Protocol Buffers, Linux, CI/CD, Git
Data & Backend: PostgreSQL, MongoDB, Parquet, Pandas, Node.js, Flask, React.js, REST APIs, Distributed Caching
ML & Frameworks: PyTorch, Ultralytics/YOLOv8, scikit-learn, Claude API (agentic tool use), BM25 & LSH Retrieval, Claude Code, OpenAI Codex

EXPERIENCE

Datadog

New York, NY

Software Engineering Intern | Reference Tables (AI & Data Platform)

May 2026 – Aug 2026

- Replaced a static, allowlist-gated Bloom filter cache with a dynamic LRU read-through cache across two Go/gRPC services, serving any reference table on first access on a lookup path built for **35M+** QPS.
- Tuned eviction policy, false-positive rate, and per-pod memory footprint against production traffic, holding **20ms** p50 on read-heavy lookups while bounding cache memory under a fixed budget.
- Migrated Bloom filter metadata from S3 blobs to a PostgreSQL index behind a dual-write path, backfilling **every commercial datacenter** through staged feature-flag rollouts with no customer-facing downtime.
- Instrumented the cache with metrics and Terraform-defined monitors; authored the design RFC and rollback playbook reviewed across two platform teams.

Wells Fargo

Charlotte, NC

Software Engineering Intern

Jun 2025 – Aug 2025

- Trained and deployed logistic regression classifiers with automated drift detection (Python, scikit-learn), lifting document classification accuracy from **84%** to **91%** in production.
- Profiled multilingual metadata across **100K+** records with langid, langdetect, and Pandas, surfacing a **15%** misclassification rate, and wrote SQL validation over Parquet workflows that caught **150+** labeling errors pre-deployment.

Creating Real

Gainesville, FL

Software Developer Intern

Jan 2024 – May 2025

- Built and deployed Go microservices, cutting API latency **60%** through routing and query optimization; implemented WebSocket real-time channels and OAuth2 authentication.

PROJECTS

strata | Founder | Go, Bloom Filters, LSH, Caching

2026

- Built a high-performance caching system for LLM APIs in Go that reuses previous responses for both identical and similar prompts, reducing unnecessary API calls and response time.
- Designed a multi-layer cache using Bloom filters, LRU caching, and LSH, serving exact cached responses in **~430ns** while maintaining a **<1%** Bloom filter false-positive rate.
- Improved semantic search performance by **25×** ($395\mu\text{s} \rightarrow 16\mu\text{s}$) and prevented duplicate API requests by combining concurrent requests into a single upstream call.

repo-scout | Founder | Python, Claude API, BM25, AI Agents

2026

- Built an AI agent that explores software repositories to answer questions about code architecture, automatically searching and reading relevant files while citing the exact source lines used.
- Built a BM25 search engine that indexed **1,085 files** and **2,326 code chunks** in **~0.6s**, enabling the agent to quickly find relevant code across large repositories.

LEADERSHIP

ColorStack, University of Florida

Gainesville, FL

VP of Corporate Relations

Jan 2025 – Present

- Secured **\$5,200** in sponsorships from NVIDIA, Bloomberg, and Capital One for a **300+** member chapter, raising women's representation to **22%**.

Society of Hispanic Professional Engineers (SHPE)

Gainesville, FL

CpE Education Advisor, Event Director

Aug 2022 – Present

- Advise members on course planning and technical interviewing; direct chapter-wide professional development events.
